AN ACADEMIC  
DISSECTION BASED  
ANATOMY COURSE  
DESIGNED **FOR**  
**OBGYN TRAINEES**

*«Seeing Things  
from a Different Angle»*

## UniTO FAST

is a structured academic certification program for gynecological anatomy created and developed at the University of Turin, Italy.

The **program** has been **tailored for trainees** and is based on an innovative educational model of **female anatomy** leading to the "fast" acquisition of the anatomical knowledge and practical dissection skills on cadaver for surgical application.

It includes **3 building blocks** for pelvic anatomy:

- Reinterpretation of known anatomy
- Simplification of surgical anatomy
- Application of anatomical surgery

The program includes **3 modules**:

- "knowledge" (theory)
- "knowledge as recognition" (practice)
- "knowledge acquisition" (testing)

### Presidents:

Chiara Benedetto  
Alessandro Vercelli

### Director:

Stefano Cosma

### AIAD President:

Maurizio Catalani

### Director of the Specialty School:

Luca Marozio

### Tutors:

Stefano Cosma  
Domenico Ferraioli Luca  
Fuso  
Luca Grasso Gabriele  
Lanzo Leonardo  
Micheletti Francesco  
Moro Annalisa Tancredi

### Faculty:

Simone Arolfo  
Marina Maria Boido  
Massimiliano Mistrangelo  
Marco Oderda  
Paolo Petruzzelli

### Technical support:

Vittorio Monasterolo

### Scientific secretariat:

Sabina Rollo Loredana  
Salton Annamaria  
Tavella

A project of:

University of Turin

Course venue: Anatomical Institutes Building  
C.so Massimo d' Azeglio 52, Turin (Italy)

In collaboration with:

*KNOWLEDGE*

*KNOWLEDGE AS RECOGNITION*

*KNOWLEDGE ACQUISITION*

## 1<sup>st</sup> day

### Below the pelvis

#### THEORY

- Surgical terminology for vulvar cancer treatment
- The Scarpa's triangle
- The classical model of pelvic anatomy
- A fascial reinterpretation of the classical female pelvic surgical anatomy: seeing things from a different angle

#### PRACTICE ON CADAVER

- Vulvar anatomy
- Inguinofemoral anatomy
- The classical model of pelvic anatomy: dissection of spaces and structures

#### TESTING

- "Make the puzzle"

## 2<sup>nd</sup> day

### The pelvis

#### THEORY

- The Parietal and Visceral compartments: suspension and support systems of viscera
- The Vascular and Neural compartments: vascular and neural crossroads of the body

#### PRACTICE ON CADAVER

- The fascial compartmentalization
- The Parietal and Vascular compartments: dissection of their anatomical structures
- The Neural and Visceral compartments: dissection of their anatomical structures
- Anatomy of the main mono/bi/tri/full-compartmental gynecological procedures

#### TESTING

- "Freaking Shapes"

## 3<sup>rd</sup> day

### Above the pelvis

#### THEORY

- Going beyond the pelvis

#### PRACTICE ON CADAVER

- Anatomic knowledge to explore the upper abdomen in gynecologic oncology

#### TESTING

- "Which came first: the chicken or the egg?"
